

Edmonton International Airport

Your Pharma Logistics Partner

Edmonton International Airport (EIA) is a self-funded, not-for-profit corporation whose mandate is to drive economic prosperity for the Edmonton Metropolitan Region. EIA is Canada's fifth-busiest airport by passenger traffic and the largest major Canadian airport by land area. EIA is one of Canada's essential cargo airports due to its advanced logistics infrastructure and strategic geographical location. EIA's cargo facilities are located close to major rail and highway transportation links to help get products to where they need to be, fast and safely. All EIA cargo facilities operate within the Port Alberta Foreign Trade Zone (FTZ), which reduces trade barriers and enhances access to key international markets.

EIA is the first airport in Canada and the most northern airport in the world to achieve community certification from the International Air Transport Association (IATA) for Center of Excellence for Independent Validators in Pharmaceutical Logistics (CEIV Pharma) - further information below. EIA is also a strategic member and board executive with Pharma.Aero, a powerful cross-industry collaboration forum for pharmaceutical product shippers, CEIV certified cargo communities, airport operators and other air cargo industry stakeholders.

Air Cargo

- Open 24/7 - with no curfews, operational or slot restrictions
- Partnerships with major freighter and air cargo operators
- Fully integrated support services, equipment and facilities
- Among the lowest operating costs in Canada
- Dedicated, multi-temperature certified facility for the safe storage, and transport of pharmaceuticals and other medical supplies

CEIV Pharma

CEIV Pharma provides assurances that medical supplies and temperature-controlled products can be handled by the certified airport community knowing they will arrive or depart in good order.

CEIV Pharma addresses industry's need for more safety, security, compliance and efficiency, by the creation of a globally consistent and recognized pharmaceutical product handling certification. CEIV Pharma provides peace of mind for global companies as it encompasses, or even supersedes, many pre-existing international standards for the transportation of medical supplies such as:

- IATA Temperature Control Regulations (TCR)
- European Union Good Distribution Practices (EU GDP)
- World Health Organization Annex 5 (pdf)
- United States Pharmacopeia Standards
